![KDSB - KENORA DISTRICT SERVICES BOARD - Caring | People | Community | Support]

Through the support of the Ministry of Housing, the Kenora District Services Board (KDSB) has conducted its first Period Prevalence Count (PPC) of homelessness in each of the nine municipalities of the Kenora District. The results of this project will help Ontario and local governments to better understand the scale and nature of homelessness in order to prevent and reduce it proactively.
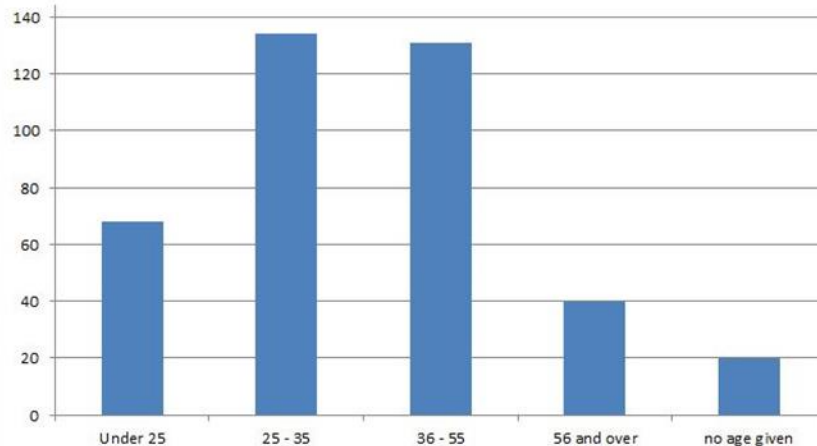

The KDSB will use the results from the PPC for future service planning and results will be available to local agencies, local government, and the general public through a report that will be presented at a community forum and on the KDSB website. This project will allow communities to gain a better understanding of the multi-faceted issues related to forms of homelessness in the Kenora District.
